

Free Maintenance Program

Remove the concern, cost and precious time it takes to maintain your property and allow us to do it for you – easy! We go over every nook and cranny of your property and show you in detail what the main areas of concern may be and what we will do to protect, preserve and extend the life of your biggest asset.

What is the Do It Easy Maintenance Program?

We will return to inspect your property every 12 months in order to prevent problems before they arise. By fixing problems before they become major issues, we aim to prevent problems escalating to very costly problems for our clients in future years to come.

Tweed Heads and its surrounding areas boast one of the best climates in the world. Unfortunately, however, the harsh elements in this coastal climate are constantly battering building structures

with rust, salt, moisture, wind, ground movement, rain, hail, etc. By visiting the property every 12 months to assess the building we can address any areas such as bubbling paint or rust stains that may need our attention before they get any worse, thus preventing any further damage.

What does it cost?

In order to participate in our Maintenance Program, we simply ask that you display one of our small “Professionally Painted by Do

It Easy Painting Services” signs at your property, in a visible area that will not interfere with the overall appearance of the building.

As long as the sign continues to be displayed on your building, we will complete an inspection every 12 months, treating and preventing any paint issues that may arise – free of charge! The Maintenance Program will continue on an ongoing basis, year after year, until the building needs to be re-painted again.

Did you know that on average a building needs to be painted every 8-10 years?

This is especially prevalent in coastal areas. Not undertaking regular maintenance of your property would be like letting your car go 100,000km before a service.

When we complete the painting works at your property, you will be provided with Your Passport to Professional Property Maintenance. Within this pack, we provide an Inspection Checklist of all of the areas of your property that are to be maintained free of charge as part of our program. Consider this Passport to be like a servicing log book for your car which helps you to monitor and prevent problems before they become too costly.

Paint and Materials

We use a wide range of different brands and products from our selected suppliers.

We only use premium paints and products from brands including Duragard, Solacoat, Haymes, Solver, Wattyl, Dulux, Taubmans, Resene, Porters and many more.

By only choosing the premium products that we know will have a long life span, we are able to have the utmost confidence in our quality workmanship.

Areas that we address during our inspections include:

- 1 Surface moisture, paint bubbling – Any paint bubbling will be repaired and repainted as required. (Note: do not prick holes in the bubbling paint as the moisture will seep in and make the problem worse)
- 2 Salty air rust erosion – Rust stains will reappear over time; cleaning, treatment and repainting as required.
- 3 Graffiti – Removing any graffiti and repainting as required.
