our respected name
and the premium products we use

Wattyl Solagard's Total Protection Technology provides total protection against Australia's harsh weather. It is UV blocking, flexible, breathable, self priming and inhibits growth of mould and mildew.

Solver Duraguard is a self priming coating formulated with UV protection. It resists mould and fungus, is fade resistant and offers life long weather protection backed by a 15 year warranty against flaking, peeling and blistering.

Granosite texture coatings give a decorative appearance and long life protection, with a higher film build than paint, hiding surface defects, enhancing eye appeal and a much longer life. They offer good flexibility, elasticity and façade water resistance performance.

Solacoat heat reflective paint coating reflects up to 90% of UV rays and 84.9% of solar rays, providing considerable savings off your powered cooling costs. Perfect for roofs and building exteriors, it offers excellent durability, waterproofing and covering properties, with proven results lasting **10+** years.

Dulux AcraTex 955 AcraShield delivers a paint like appearance with film builds twice that of standard decorative paint for enhanced crack bridging performance. AcraTex Texture Systems are specified with AcraShield weather-proofing topcoat for optimum life cycle efficiency.

Dulux Weathershield's unique MaxiFlex™ Stretch Technology gives a tough flexible finish, for long life protection in all Australian weather conditions. Dulux guarantees that this product will not blister, flake or peel for as long as you are living in your property.
